Out side B vehicles Engine 500cc flat four Wisconsin  
out of yankee generator, hand made sprockets, cylinder heads  
Machined and ported and polished, Solex carburetor of 1600cc VW  
Motor, fuel tank from stove, steering wheel cut out of a piece of  
flat aluminium . The frame was welded by Dennis Edwards.

Terry Chipman in the first kart we built but the aluminium tubing from the supply tent but it was to soft although very light weight but bent all the time and to much flex causing the chain to come off
